SUMMARY

Full-stack developer and AI/ML enthusiast with experience building production-ready apps using React, Django, Node.js, React Native, and Python. Comfortable across the stack — from training ML models to shipping mobile UIs. Seeking opportunities to leverage my technical skills, contribute to meaningful projects, and grow as a software developer.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, Java, C, C++
Frontend: React, React Native, Bootstrap, HTML/CSS
Backend: Django, Node.js, PHP
Databases: MySQL, SQLite, MongoDB
Tools: Git/GitHub, VS, VS Code, Android Studio, PyCharm

PROJECTS

Infant-Care Assist| React Native, Node.js, MongoDB, Python

- Developed an AI-powered mobile application to assist parents in managing infant care by analyzing baby cries and predicting reasons.
- Integrated features like cry detection, feeding dashboard, real-time alerts, chatbot assistance, and emergency support for nearby hospitals and contacts.
- Used React Native for frontend design, Node.js for backend logic, Python for AI/ML model development and Chatbot, and SQLite for database management.
  GitHub:

Emotion-Based Music Player| React, Django, Python, SQLite

- Developed an intelligent music player that recommends songs based on user emotions detected through facial expressions.
- Integrated music recommendation logic to play songs according to detected moods such as happy, sad, or neutral.
- Used React for frontend design, Django for backend logic, Python for AI/ML model development, and SQLite for database management.

Android-Fitness App| Java, XML, SQLite

- Developed a user-friendly Android fitness application that enables users to track workouts, manage profiles, and monitor health metrics such as BMI.
- Implemented features like workout search and exercise recommendations based on user preferences to enhance personalized fitness experience.
- Designed an admin panel to manage users and workout content, including adding, viewing, and deleting exercises to maintain data quality.
- Built the application using Java for backend logic and XML for frontend design, with SQLite integration for efficient data management and smooth performance.

EXPERIENCE

TouchQ Software Solutions Pvt. Ltd., Vytilla, Kochi |Intern — May 2025 – June 2025

- Worked as a Web Development Intern.
- Contributed to building an internal web platform using HTML, CSS, PHP, Node.js and MySQL.
- Designed and implemented responsive UI components, improving cross-device usability.
- Handled backend workflows including database operations, query optimization, and debugging.
- Worked across the full development cycle from requirement gathering to deployment.

EDUCATION

Bachelor Of Technology in INFORMATION TECHNOLOGY at COCHIN UNIVERSITY OF SCIENCE AND TECHNOLOGY. — 2022 - 2026

ACHIEVEMENTS

Class Representative | BTECH IT — 2023 –2026

- Represented the class for 3 years, coordinating communication between students and faculty.
