## SUMMARY

Full-stack developer and AI/ML enthusiast with experience building production-ready apps using React, Django, Node.js, React Native, and Python. Comfortable across the stack — from training ML models to shipping mobile UIs. Seeking opportunities to leverage my technical skills, contribute to meaningful projects, and grow as a software developer.

## TECHNICAL SKILLS

**Programming Languages:** Python, JavaScript, Java, C, C++
**Frontend:** React, React Native, Bootstrap, HTML/CSS
**Backend:** Django, Node.js, PHP
**Databases:** MySQL, SQLite, MongoDB
**Tools:** Git/GitHub, VS, VS Code, Android Studio, PyCharm

## PROJECTS

**Infant-Care Assist**| React Native, Node.js, MongoDB, Python — January 2026 – Present

- Developed an AI-powered mobile application to assist parents in managing infant care by analyzing baby cries and predicting reasons.
- Integrated features like cry detection, feeding dashboard, real-time alerts, chatbot assistance, and emergency support for nearby hospitals and contacts.
- Used React Native for frontend design, Node.js for backend logic, Python for AI/ML model development and Chatbot, and SQLite for database management.
  **GitHub:**

**Emotion-Based Music Player**| React, Django, Python, SQLite

- Developed an intelligent music player that recommends songs based on user emotions detected through facial expressions.
- Integrated music recommendation logic to play songs according to detected moods such as happy, sad, or neutral.
- Used React for frontend design, Django for backend logic, Python for AI/ML model development, and SQLite for database management.
  **GitHub:** https://github.com/thejzxt/Emotion-based-music-player

**Android-Fitness App|** Java, XML, SQLite

- Developed a user-friendly Android fitness application that enables users to track workouts, manage profiles, and monitor health metrics such as BMI.
- Implemented features like workout search and exercise recommendations based on user preferences to enhance personalized fitness experience.
- Designed an admin panel to manage users and workout content, including adding, viewing, and deleting exercises to maintain data quality.
- Built the application using Java for backend logic and XML for frontend design, with SQLite integration for efficient data management and smooth performance.

## EXPERIENCE

**TouchQ Software Solutions Pvt. Ltd., Vytilla, Kochi** |Intern — May 2025 – June 2025

- Worked as a Web Development Intern.
- Contributed to building an internal web platform using HTML, CSS, PHP, Node.js and MySQL.
- Designed and implemented responsive UI components, improving cross-device usability.
- Handled backend workflows including database operations, query optimization, and debugging.
- Worked across the full development cycle from requirement gathering to deployment.

## EDUCATION

Bachelor Of Technology in INFORMATION TECHNOLOGY at COCHIN UNIVERSITY OF SCIENCE AND TECHNOLOGY. — 2022 - 2026

## ACHIEVEMENTS

**Class Representative** | BTECH IT — 2023 –2026

- Represented the class for 3 years, coordinating communication between students and faculty.
